SPACE SAVINGS are Only the Beginning!

Double your filing capacity or free up to 50% of your existing floor space for other uses ... work stations ... a conference center ... mail room, etc.

By mounting shelving units on movable carriages that roll on tracks, SpacePro® by Tennsco eliminates the need for aisles. You can utilize your existing shelving or filing cabinets with the SpacePro system or select from a wide range of storage options.

High Density, Very High Style

From high end legal offices, medical facilities and financial institutions to warehouse operations, SpacePro complements the style of your workplace with a virtually endless selection of end panels in solid colors, woodgrains and beautiful designer patterns.

Custom Designs, Creative Solutions

Our experienced Sales Team and CAD Design department can create a custom layout targeting your specific needs.

QUALITY ENGINEERING sets SpacePro[®] apart!

DETAILS make the DIFFERENCE

Multiple Track Designs

All SpacePro track designs can incorporate tongue and groove rail connections to maintain proper rail alignment for smooth and easy carriage movement with minimal effort. From small surface mount track systems to raised level deck systems, SpacePro has the track to suit your needs.

Solid Foundation

SpacePro deck systems utilize top grade 3/4" tongue and groove plywood providing a level, safe and substantial walking surface ideal for the floor covering of your choice.

Carriage Design

All carriages come complete with welded cross members that utilize factory installed and tested dual flange wheels housed in lifetime maintenance free bearings.

Mechanical Assist Drive System with Ergonomic Handle

Mechanical assist systems feature full-length drive shafts. By turning the handle, the chain drive transfers power to the drive shaft, moving all drive wheels throughout the carriage simultaneously. This prevents racking of carriages. A simple chain tensioning device provides infinite chain adjustment for trouble-free use. Manually moved carriages are also available for smaller systems.

SpacePro's uniquely designed mechanical assist handle affords effortless carriage movement. By grasping and turning one of the three rotating knobs, users can easily move multiple carriages at one time. The die cast aluminum construction and powder coat finish provide a combination of aesthetics and durability suitable for high-end office environments or heavy industrial work settings.

Electrical Drive System with Touchpad Control

With this state-of-the-art computerized electrical drive system, multiple carriages can be moved with just a touch. The advanced touchpad design provides oversized touch areas for "hands full" operation and an ADA friendly environment. Options include an interface with file tracking software, building alarm and fire suppression systems as well as remote computer control.

Safety First

All electrical SpacePro Systems include a standard three level redundant safety system. All mechanical assist handles are equipped with a safety locking pin to disable carriage movement. Carriage mounted bumpers provide the proper spacing for media protection.

Storage Units

Space Pro carriages are designed to accept virtually every style of shelving and cabinetry.

Track end stops

Electrical Touchpad Control

Carriage bumpers for media protection

Unique one-piece welded wheel channels create the industry's strongest carriage framework

Mechanical assist handle with push/pull safety pin

All systems have dual flange wheels to eliminate carriage derailment

Neoprene track inserts eliminate debris collection, allowing carriages to roll smoothly

AND IN THE END...

More Space

More Versatility

More Value

Large or small, **SpacePro** has the solution for your storage requirements. By installing storage equipment on movable carriages (eliminating wasted aisles), you can double your storage capacity or free up valuable floor space for other facets of your operations. Consult your authorized **SpacePro** distributor for details.
