medical information cards

ICE Medical Alert Card and MED Card are the size of a credit card and are perfect as giveaways for; Doctors' Offices, Hospitals, Retirement Homes/Extended Care Facilities, College Admissions Packets, New Hire Packets, And Much More. These useful cards allow the individual to fill in pertinent medical information that can then be stored in a wallet in case of emergency or for quick reference. ICE Medical Alert Card and MED Card have a laminating seal to protect the written information and eliminate smudging. Folded together, the card is strong, durable and water resistant. Empty displays available.

The cards are also customizable to fit your business needs. Contact Customer Service for a Quote.

custom index tab filebacks & dividers

Custom Index Tab Dividers

custom index tab dividers are the cost-effective choice for organizing important papers within your file folder or binder. From medical charts to legal folders or overall general filing, using **custom index tab dividers** allows for quick access to information in a wide range of applications. Choose your own tab titles, color selection, and style that will fit your budget and filing needs.

CUSTOM INDEX

Easy Ordering Instructions:

- Specify paper weight and divider color:
 - 90 lb. or 110 lb.
 - White or ivory (manila) stock
- Choose tab print style and punch hole positions:
 - Side or bottom tabs
 - 5, 3, or 2 hole punch
- Specify tab cut size and tab extension
- List tab titles, positions, and colors
- Choose packaging options:
 - Collated / titles boxed together in sets
 - Non-Collated / each title boxed individually

Custom Fileback Dividers

custom fileback dividers take file organization one step further. Each section is self-contained and information can be easily removed without disturbing other sections. Each **custom fileback divider** has a permanent heat-bonded fastener applied to the top or side of the divider allowing for easy and quick retrieval of information.

CUSTOM FILEBACK

Easy Ordering Instructions:

- Specify side or bottom tabs
- Choose fastener: top or side
- Specify style:
 - hinge or self-adhesive
- List tab positions, titles, and colors
- Choose packaging options:
 - Collated / titles boxed together in sets
 - Non-Collated / each title boxed individually

TAB TIP: Plan ahead! Allow for expansion and add a write-on erasable tab to use for your specific office needs.

admission index tabs & divider sheets

admission index tabs and **divider sheets** make indexing of admission files easy and economical. No more wasted pre-tabbed and numbered divider sheets. Tabs are easily attached to position marks on the 8-1/2" x 11" four-hole punched divider sheets. Admission index tabs and divider sheets can be used for either side or top fastened medical record folders. Self-adhesive 1-1/2" tabs are plastic laminated. 100 per package.

patient sign-in label forms

Confidentially sign in your patients with **patient sign-in label forms**. Forms limit access to personal information as required by HIPAA compliance regulations. Patients sign in on next available removable numbered label strip. Patient then takes the numbered label and waits to be called by name or number. Office staff removes numbered label strip with patient name and adheres it to patient chart to help improve recordkeeping. Once label strips have been removed, the patient information is now protected behind special backing paper. The Sign-In form also provides a confidential daily patient log.

self-adhesive divider sheets

CUSTOM INDEXING
See Page 6

Quickly convert your standard folders to classification folders. Just fold on the score line to create a flap, then remove protective strip and apply to folder—it's that easy! Sturdy **divider sheets** are 11 pt. manila stock. Die-cuts on flap allow for easy positioning around fasteners. **Divider sheets** come in several options: no fastener, 1 fastener on front of divider, or 2 fasteners on both sides of divider. 8-1/2" w x 11" h (not including flap) – 100 dividers per package.

stock no.	fastener(s)
26330	None
263301	1-Fastener Front Top – Pos. #1
263305	1-Fastener Front Side – Pos. #5
2633013	2-Fasteners Top of both sides – Pos. #1 & #3

Fold on score line,
peel away backing sheet
and apply to folder

fileback dividers

fileback dividers allow immediate access to each section without removing the top sections from the folder. Each **fileback divider** is scored for easy folding and comes with an installed 2" capacity fastener. Fold score line to form flap and slip divider over existing fastener in folder. The next divider is attached to the fastener on the first divider, and so on. Sturdy 11 pt. manila stock. Available with or without (bottom) end tab cut. 100 dividers per pkg.

- ◆ Manila stock to match your folder.

cov'r'tabs

Easy way to re-use old folders. Self-adhesive and wrap-around design adds reinforcement to tab. Printed score marks for even positioning of new labels. 60 lb. in manila color finish. Strip must be applied to folder *before* application of new labels. Opaque feature prevents previous color coding from showing through.

stock no.	size	cov'r'tabs/pkg.
55990	2-1/2"w x 8"h	50

sup'r grip fasteners

Self-adhesive **sup'r grip fasteners** are an ideal space-saving solution for large files. Long 2" prongs accommodate 2-hole punched material, while the ultra-thin design saves valuable filing space. Fasteners are heat bonded onto pressure-sensitive, 60 lb. manila-colored paper to hold even the bulkiest files without tearing. Printed aligning guides on each strip ensure accurate placement. 4 fasteners per sheet; 25 sheets per box.

stock no.	description	fasteners/box
56805	sup'r grip fasteners	100

duo-prong fasteners

duo-prong fasteners are used when fasteners are required on both the front and back of a divider sheet for 2-hole punched documents. Fastener capacity is 1" on one side and 5/8" on the other. Simply insert 1" prongs thru slits in divider sheet, and bend prongs back. No adhesive required.

stock no.	description	fasteners/box
26808	duo-prong fasteners	100

earflap™ fasteners

Turn existing file folders into classification folders easily and inexpensively. Section files by date, subject or other criteria that fit your needs.

Slip the punched flap over an existing fastener and close the prongs. Fold flap forward and add filing material to the bonded fastener on top of the manila strip. **earflap™ fasteners** work with any two-prong fastener in all folder positions.

stock no.	description	fasteners/box
56809	earflap fasteners	50

foamclip® fasteners

Self-adhesive **foamclip® fasteners** are a perfect choice for organizing any 2-hole punched papers. These fasteners bond permanently to file folders, pressboard, plastic, wood, glass, even metal. With their superior strength, **foamclip® fasteners** can't be pulled off like other brands! The 2-3/4" center-to-center, 1-1/2" capacity fastener is easy to use; just peel off backing paper and press fastener into place.

stock no.	description	fasteners/box
56807	foamclip fasteners	100

jalemaclip fasteners

jalemaclip fasteners are 5" capacity fasteners that allow you to access any part of the file without having to remove the file contents. Make notes, copy or review the pages within the file quickly and easily. For use with 2-hole punched documents. Holes are positioned 2-3/4", center-to-center. Sets consist of self-adhesive bases, compressor bars and u-shaped extensions.

stock no.	description	fasteners/box
56804	jalemaclip fasteners	100

u-file-m binder strips

u-file-m binder strips make each folder read like a book. Documents are affixed to a strip of tabs in either ascending or descending order. File by either older information first, or by newer information on top. Instructions included. Permanent adhesive.

stock no.	description	strips/box
56820	u-file-m binder strip	100

Strip holds up to 22 sheets.

factory installed fasteners

permclip® fasteners are heat-bonded for permanent adhesion to the file folder. **permclip® fasteners** are factory installed in any position to fit your filing needs. Prongs are 2" in length and 2-3/4" center to center. Please specify fastener position from the position guide at the time of order.

full end tab protectors

end tab protectors are an ideal solution for extending the life of shelf file folders. Clear protectors wrap around folder end tabs, preventing labels from cracking or popping off, and protect against wear and tear.

Self-adhesive, 8" x 2" protectors can be easily applied to all types of end tab file folders to keep them looking neat and clean longer.

stock no.	size	protectors/pkg.
68386	8"h x 2"w	100

spine edge protectors

edge protectors keep heavily used file folders looking good longer by protecting edges from cracking or splitting. The 11" x 2" clear, wrap-around protector is easily applied to the bottom edge of a file folder, where the most wear and tear occurs as the folder is moved in and out of shelf file cabinets.

stock no.	size	protectors/pkg.
68387	11"w x 2"h	100

All of the above products can also be used to reinforce documents and page edges that require hole punching and insertion into binders or folders with fasteners. Simply follow the easy application instructions on the pack of each strip, then punch the document as needed.

lock-it pockets

Durable, clear polyethylene ziplock style secures small documents, including photos, flash drives, CD's, x-rays and much more. Peel off self-adhesive 5 mil poly pocket. Permanently apply to your folders or wherever it is most convenient. Clear front keeps important information at full view without opening the pocket.

blank strip labels

Let **TABBIES** quote you on manufacturing any 8-1/2" x 11" strip label sheets. We can match any computer generated blank label configuration for use with any color coded label on demand system in the marketplace today. Call **TABBIES** Customer Service for further information and a quote.

laser/inkjet label sheets

Multi-use **laser/inkjet label sheets** are useful for mailings, announcements, getting organized, tracking or recalling documents and more. Permanent labels are easy to apply for convenient, personalized labels anytime. Sheets are shrink-wrapped in packages and are fully compatible with both laser and inkjet printers. Labels feed automatically from paper tray and are centered on sheets so they can be fed using either the top or bottom as the lead edge. *See your printer manual for additional feeding instructions.*

color code filing made easy

Color coding is the assignment of color to a number, letter or particular item that shows meaning. In filing, we assign a color for each number 0 through 9, and a color for each letter A through Z, to aid in filing and retrieval of all types of hard copy files. By putting these colors (letters, numbers and designators) in a particular position on a file folder, file pocket, etc., a color/block pattern is formed. When these patterns of color are broken, a misfile has occurred. In retrieving a file, color recognition reduces look-up time. It also saves presorting time and reduces filing time. In fact, color coded filing can reduce filing and retrieval time by up to 50%. Approximately 75% of every dollar spent in filing areas is people time; therefore, color coding can save as much or more than 33% of the money that is now spent on your present non-color coded files. Misfiles are virtually non-existent in color coded files because of the ease of spotting a file when it is out of order. Memorization of colors is not necessary; the color works as a flag which identifies position or meaning in a file sequence. A good color code system can work for your files, and in most cases pays for itself in less than a year due to the time saved in filing and retrieval without misfiles. Since most files are filed in one of the demonstrated examples, you can easily adapt your file situation to color coding.

alphabetical filing

alphabetical color coded name files are easy to maintain without requiring a cross reference file. Color coding alphabetical breakdowns of initials with color can direct you to the proper file area and help eliminate misfiles, which are most common in non-color coded alphabetical files. Filing of common names is accomplished by coding the first two letters of the last name; for example, James C. Bayer would be coded "BA". In larger alphabetical files, the additional coding of the first name initial will further break up the large name groupings in the file. Using "J" for James, we now can go immediately to the "BA" section and then to the "J" section in the "BA" group to retrieve or refile. When filing corporate or company names, it is suggested to use the first two or three letters of the first full proper name; for example, "Ajax Tool Works" would be coded "AJA".

alpha-numeric filing

alpha-numeric filing is simply the filing of letters and numbers in a format that suits the file situation. Many times, files have alphabetical indicators which have a particular meaning in a numeric file, or vice versa. When filing alpha-numeric files, a decision must be made as to whether the number or the letter is more important for locating or segregating the file, since the file can be set up either way. An example of alpha-numeric filing (at left) shows a construction company using the alpha prefix of the state in which the construction site is located. In the illustration, IL (postal abbreviation) is for the state of Illinois, job number 123. Job number 124 has the indicator AZ, showing that the construction site is in Arizona, which is a misfile. The files are kept in alphabetical order by state, then in numerical order by job numbers which are assigned in sequence as construction sites become available. Alpha-numeric files need not be complicated; numbers or letters used in an alpha-numeric file can give added dimension for presorting, filing and retrieval.

Note that AZ 124 is a misfile.

straight numeric filing

straight numeric filing is the filing of numbered documents in a numerical sequence order starting from the first number and proceeding to the highest numbered file (last or most recent). Color coding a straight numeric file is somewhat dependent upon the total number of files. In the example, we have color coded all five digits. In straight numeric filing, time-saving and cost-saving advantages can be gained by coding the last two digits (tens and units) of the number with one double-digit color block. (Note - the units and tens digit must be color coded separately if you are considering converting to terminal digit filing at a later date.) The major advantages of straight numeric filing are (1) no training of file personnel, since most people know how to find files if they are numbered from the lowest through the highest number in the files, (2) ease of retiring old files. In most cases of straight numeric files, the oldest files are the ones with the lowest numbers.

terminal digit filing

terminal digit filing is the filing of all files ending in the same last two digits in one section, forming 100 distinct file groups (00 through 99) in any given file number situation. The use of terminal digit filing is usually seen in large file areas: hospitals, insurance companies, government, banking, etc. It speeds up retrieval time and reduces refile time by segregating files into groups of 00 through 99 (example #12345) terminal digits (45), middle digits (23 within the 45 section) and tertiary digits (01 within the 23 section). For example, file 12345 (01-23-45) would be filed in the 45 section next to file 2345 (00-23-45). File 12346 (01-23-46) which would normally be put next to 12345, would be filed in the 46 section (then in the 23 section, then 01 within 23 section). Note the misfile - two files in the 45 section between subsections 21 and 22 that should be in the middle digit section 24 (file numbers larger than six digits can also be filed in terminal digit order). The major advantage of terminal digit filing is that the file grows equally in 100 places and reduces itself in 100 places with the retirement of older files, forming an equal growth pattern in the file.

original col'r'tab® color code labels

Original Col'RTab® color code labels provide the best value of any label system in the industry. The unique hinged construction allows for consistent and quick application to file folders, pockets, or even pressboard folders. The clear, outside skirt offsets any tendency for the labels to "hook" onto one another when pulled from the shelf. Made with heavy duty paper and fade-resistant inks. Do not settle for inexpensive color matches – realize the value and savings by using only original Col'RTab products!

12000 / 82000 series Original Col'RTab®
