

ThinStak® General Information & Specifications

GENERAL INFORMATION

Product Description: The ThinStak® Shelving System is designed to maximize storage capacity while utilizing a minimum of floor space. Each section consists of individual shelf tiers that stack on top of each other to form a complete shelving unit, up to 8 levels high.

Typical Application: American Filing Solutions offers the most complete line of stackable tiers in the market today. Typical tier applications include:

Letter: Primarily used for Side Tab Color Coded file folders.

Legal: Available in 1" greater opening which are ideal for expandable pocket folders.

Medical: Including X-Ray and mammography jacket storage and mini folder for dental and optical records.

Sports: VHS Tape storage for High School, College, and Professional game films.

Reference Material: Tiers are available in three depths for Binder and Book Storage.

SPECIFICATIONS

Material and Workmanship: All ThinStak® tiers are manufactured from high quality, cold rolled steel, free of scale or rust. Exposed edges, corners and surface areas are free of any sharp edges. Tier components are joined together using state-of-the-art welding and manufacturing technologies.

Assembly: Each shelving section requires one base and one top set. Each tier is independent of each other and may be joined together. Shelving tiers are joined together using nut and bolt assembly (recommended for mobile storage use) or drive rivets (stand alone units). Each tier will have corresponding holes for easy assembly.

Tier Side: Tier sides are constructed of a one-piece section of 20 gauge steel, formed to make three sides incorporating a continuous 3/4" flange on top and bottom.

Shelf:

Fixed Divider Systems: The shelf is manufactured from a single piece of 20 gauge steel formed with a 1/8" hem closed in front. The shelf is punched to receive the bottom of each welded divider. The shelf is then welded directly to the side along the 3/4" flange.

Movable Divider Systems: The shelf is manufactured from a single piece of 20 gauge steel formed with a 1/8" hem closed in front and a channel that accepts the movable divider. The channel is formed along the entire width of the shelf. The shelf is welded to the tier side along the 3/4" flange. The shelf is reinforced with one 20 gauge steel-formed support channel. This support channel is welded to the shelf bottom, supporting the shelf along its entire width.

Divider:

Fixed Divider Systems: The divider is manufactured from 20 gauge steel. Each divider is formed with two 5/8" flanges on each end. One flange is welded directly to the shelf back and the other interlocks and is welded to the shelf bottom, forming a smooth, non-obstructing support.

Movable Divider Systems: The movable plate divider is manufactured from 16 gauge steel. The divider attaches itself into the shelf channel. The shelf channel allows the divider to be positioned at any location along the tier width. One black painted divider is supplied per tier.

Top: The top is manufactured from a single sheet of 20 gauge steel with a 1" formed channel on all four sides. When installed, the rear of the top will interlock with the top of the upper-most tier and then bolt in place along the sides.

Base: The base is manufactured from a single sheet of 16 gauge steel with a minimum of a one inch formed channel on all four sides. The base is available in three height configurations. A two-inch high base is standard (TrakSlider™ Systems require a 2" base). One and four inch bases are also available. Leveling guides are included with the two and four inch bases only.

Size and Colors: ThinStak® tiers are available in a wide variety of sizes and colors to fit virtually any application and room decor. ThinStak® tier sizes include: 24", 30", 36", 42", and 48" widths in either fixed welded divider or movable plate divider. ThinStak® tiers are available in 19 standard paint colors. Other colors are available. Contact American Filing Solutions at 888-891-1970 x 8958 for more information.

Finish: All steel parts are thoroughly cleaned using a three-stage iron phosphate washer and then coated with an Epoxy-Hybrid powder coat finish using a state-of-the-art electrostatic paint system. Powder coating provides a superior, attractive, uniform finish that is more durable, scratch and corrosion resistant, and environmentally friendly than liquid paint.

Compatibility: All ThinStak® tiers are compatible to SUPREME THINLINE tiers in color and size.

Estimated Media Weights:

Letter: 2 – 2-1/2 pounds per filing inch

X-Ray: 8 pounds per filing inch

Legal: 2-1/2 – 3 pounds per filing inch

Book & Binder: 3 – 3-1/2 pounds per filing inch

FOR ADDITIONAL INFORMATION ON ORDERING, TERMS AND CONDITIONS, PRICING AND SHIPPING, PLEASE CONTACT AMERICAN FILING SOLUTIONS.

Standard Paint Information

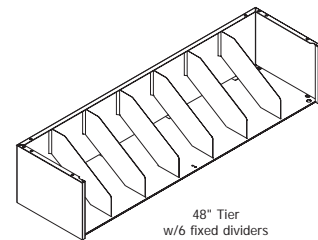

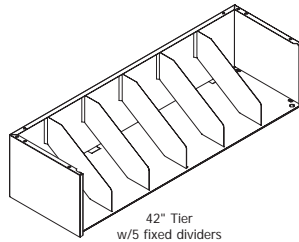

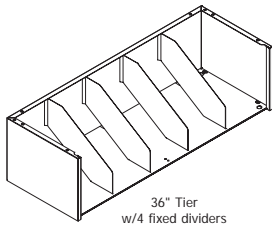

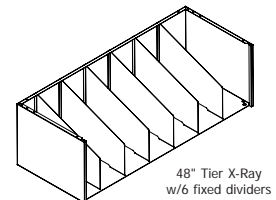

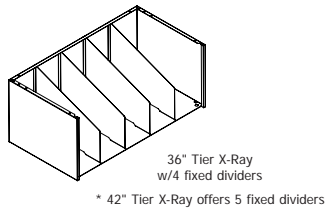

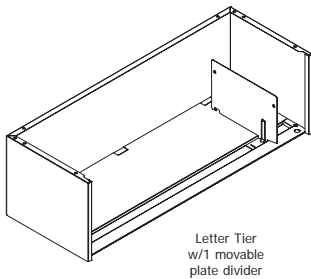

The following charts represent our standard paint and melamine/laminate colors. Custom match colors are available, to include other manufacturers' colors. Contact American Filing Solutions for details.

Standard Paint Colors

T22 - Warm Brown
T15 - Bone White
T46 - Soft White
T48 - Ivory
T45 - Dark Gray Metallic
T23 - Medium Gray Metallic
T34 - Light Gray Metallic
T56 - Tan Metallic
T25 - Black
T86 - Gray Mist
T47 - Light Gray
T12 - Dove Gray
T29 - Sage
T41 - Slate Blue
T42 - Tech Blue
T17 - Burgundy
T58 - Blue
T93 - Safety Yellow
T27 - Industrial Red

Standard Melamine/Laminate Colors

M25 / L25 - Sapelli Mahogany
M15 / L15 - Finnish Oak
