MOHAWK SERIES

Mohawk is a series design driven by the need for a high value yet moderately priced library solution. Mohawk delivers a complete answer for the requirements of the value driven project.

Management

Committed To Continued Improvement. In today's world economies, we understand the importance of creating a culture of change to embrace and implement Lean.

Committed to the Environment. The Northeast forest is the largest intact forest ecosystem east of the Mississippi that spans 30 million acres across Maine, New Hampshire, Vermont and New York. Its ecological significance is well-known with vast areas of wild forest, critical habitat and the headwaters of major rivers. But it is more than an ecological resource. It is also home to 2 million people whose cultures, livelihoods, families, aspirations and dreams are tied to the forest. Hale Mfg. Co. and our employees are proud to call this home. It is our intent to conduct all aspects of business, from the purchasing department to the finishing and packaging departments, in an environmentally responsible way to protect our planet for future generations.

Layouts for today's library can be challenging. But, Hale's experienced support team is here to help with the details. We provide custom widths, depths, heights, designs, and finish matching. We can handle difficult molding pieces, filler strips, cutouts for heat circulation, and cutouts for electricity. The range of storage possibilities is limitless with mobile units, filing options, and door and drawer applications.

Our range of products and ability to custom-service your needs—**enable you** to build solid foundations

Our approach is to offer these series as building blocks, or foundations, to give you the ability to create furniture using these designs, or blend in your own style and features to meet your unique requirements. Our customer service team is ready to help in designing a library to fit your environment, style, and your budget.

Product & Options

The Mohawk Series is standard with the classic, clean-edge architectural design, and can be customized with molding, door, and leg options to work in traditional, transitional, or contemporary interiors. The Mohawk Series is designed to meet an array of specifications and can be customized to meet your budget. This series can be supplied in genuine walnut, cherry, or maple in addition to our standard red oak offering.

One-inch thick commercial-grade veneer core uprights. Solid wood edge banding imparts fine detailing and extra durability at common stress points. Only select grade genuine hardwood veneers are used. Hardwood lumber of the same specie is used in components where durability is paramount. Shelf options include 3/4" solid red oak, 18 gauge steel shelves; divider shelves; CD, DVD, and periodical display shelves.

craftsmanship/quality/longevity/complexity/simplicity

At Hale, you'll find that we produce and finish things differently. Our true wood joinery is made to withstand years of service. There are no open joints, incorrect machining, added labor expenses of assembly, or damages caused by assembly crews. We have the ability to reconfigure layouts on the spot, and add pieces to your environment at any time.

The fundamental building blocks begin here...

M

MOHAWK SERIES

The worst thing about new books is that they keep us from reading the old ones. — Joseph Joubert
