ATM MasterPic™

COLORFLEX APPLICATION SOLUTION

MASTER**PIC** : : LEKTRIEVER® INTERFACE MODULE

MasterPic is Colorflex's newly created MasterTrak Plus interface module developed to automate retrieval and re-file functions with the Lektriever Electric Lateral Filing system from Kardex/Remstar. The new interface allows users to look up records on the MasterTrak Plus software screen and instantly and automatically move the Lektriever to the appropriate shelf or location.

Within MasterTrak Plus, files can be Requested. The File Request Slips can be printed out to be used as Pick lists, Routing Slips or markers in an Outguide. MasterPic will enable Users to retrieve records

MasterPic is an integrated component of MasterTrak Plus, a Records Management System which allows users to print color filing labels, Check Records In or Out, using Barcodes or RFID. MasterTrak Plus works seamlessly with the DESKMATE software product to automatically track files around the office.

Kardex/Remstar Dealers now have a Record Tracking system with automation enhancements which can handle all the requirements of the file room, including an integrated color label printing program.

automatically from the Request Buffer file for faster retrievals. All the User has to do is press the Retrieve Requests button on the MasterPic user interface screen and the Lektriever will automatically move to the next file in the request list and wait for a Next command.

Who says that you can't improve on EFFICIENCY!
